

solana

- hello world, i am a new coder i want to download solana cli for wind prebuilt but i can only see 9 assets and non of them is for window --> <https://github.com/solana-labs/solana/issues/24119>
- Solana cli: solana program deploy should support proxy for wss:// --> <https://github.com/solana-labs/solana/issues/24118>
- solana 1.10.{3,5,6} build issue --> <https://github.com/solana-labs/solana/issues/24114>
- Estimated block units are too high compare to actual executed units. --> <https://github.com/solana-labs/solana/issues/24106>
- @solana/web3.js No logs after reconnecting, due to missed _resetSubscriptions for logs. --> <https://github.com/solana-labs/solana/issues/24100>
- Allow the caller of connection.sendTransaction to assign their own blockhash to transaction --> <https://github.com/solana-labs/solana/issues/24098>
- unable to download release for windows - docs point to testnet release which does not include windows build --> <https://github.com/solana-labs/solana/issues/24092>
- Solana command line via proxy --> <https://github.com/solana-labs/solana/issues/24075>
